

# Admin Dashboard

The admin dashboard contains a myriad of useful information and functionality.

At the top of the dashboard, you will notice several buttons (view reminders, create user and create entity). Just below the aforementioned buttons you will see some information blocks that will tell you how many users, entrepreneurs, and entities are in the system as well as a block with referrals and they're overall status.

Once past the more basic info section you will find a list of your past and future meetings (though you may hide them if you wish).
